

Time: 10:30 -11:30 AM

Date: Thursday 10/8/15

Location: Design Suit

Duration: 60 Minutes

Agenda:

- 1) Discuss all reviewed cutters and teeth
- 2) Pick a direction of action for snapshot

Note: Tool Stock for grinding teeth is super cheap – immediate action would be nice. Hack saw blades are cheap as well – need immediate action and prototype. Lathe Teeth are very expensive. Cannot afford them unless we have a model that we know will work.

Tool stock would require client to grind their own teeth in future.

Action Items

- 1) Hacksaw blade idea – Andy
- 2) Grinding teeth idea – Alan
- 3) Lathe bit idea – Tony
- 4) Purchase material – Lane
